9.7 nm SW of Lu-ta.

This installation presently is the base from which the Chinese G-class submarine has been operating. Facilities to repair patrol craft are also under construction. Extensive excavation, and some construction in the ravines adjoining the facility appear to be associated with the base, although the function of this area cannot yet be determined.

Facilities include 2 peninsular breakwaters, 1 marginal wharf under construction, 1 transverser serving storage ramps, 1 small finger pier under construction, 1 L-Head Pier at the end of a long causeway, extensive shoreline improvement, 1 support building adjoining the marginal wharf, 1 probable heating plant, 1 probable batch concrete plant and associated construction support buildings, 1 small winch house at the head of the transverser, 7 probable construction support buildings adjoining the transverser area, and a possible administration/support complex of 9 buildings, the largest of which is in the early stages of construction.

On the west side of Hai-yang Tao on the Hai-yang-Tao Wan. Hai-yang Tao is located in the Korea Bay approximately 35 nm south of the Chinese Mainland.

The three portions of this base complex comprise a permanent forward area operating base, protecting the Lu-ta-Lu-shun complexes. Vessels deployed here include PGM's, PTF's and PT's.

25X1A

25X1A

The base complex is comprised of three separately targeted facilities --
Hai-yang Tao Naval Base West [REDACTED], Hai-yang Tao Naval Base
East [REDACTED] and Hai-yang Tao Naval Base North [REDACTED]. 25X1A
